

Jonathan Durante

Full-Stack Developer .NET

jonathandurante@gmail.com | +54 9 11 41476732 | linkedin.com/in/jonathangdurante | github.com/JonaDurante

SUMMARY

.NET Full-Stack Developer with more than 5 years of experience in the development and maintenance of web applications, CRM, migrations, and process automation. Accustomed to working in collaborative environments with agile methodologies like Scrum, focused on continuous improvement, code quality, and the delivery of efficient solutions.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | 2024 - Present

Heinleing Groupepe

- Development and maintenance of .NET Full-Stack web applications, using .NET 8, Entity Framework, SQL Server, Angular, and Razor.
- Successful migration of solutions to new frameworks and modernization of legacy projects.
- Active participation in agile teams using the Scrum methodology, managing tasks, CI/CD, and version control with Azure DevOps and Git.

Full-Stack Developer | 2022-2023

Setup Informática

- Development and maintenance of .NET Full-Stack web applications with .NET 5.3, Entity Framework, Razor, and Ionic.
- Participation in from-scratch development projects, migration of existing solutions, and code review.
- Teamwork under an Agile methodology, with a focus on code quality and the continuous evolution of solutions.

Full-Stack Developer | 2020-2022

EY (Ernst & Young)

- Development and maintenance of enterprise applications with Visual Basic.NET 4, participating in the development of solutions from scratch.
- Implementation of system migrations and process optimization through automation.
- Participation in continuous improvement processes and incident management, ensuring the quality and stability of delivered solutions.

QA Analyst | 2019-2020

Accusys

- Functional analysis of requirements and design of test cases to ensure software quality.
- Execution of manual tests (black-box, smoke testing, regression, usability, and stress), identifying errors and improving product stability.
- Database validation on SQL Server with Microsoft SQL Management Studio.
- Use of tools like Swagger for API testing and task management with Jira and Azure DevOps.

TECHNOLOGIES USED

- **Languages:** C#, Visual Basic.NET, TypeScript, JavaScript, HTML5, CSS3
